

LET'S PULL TOGETHER

Our dump bodies are not just a smart investment built to perform for the long haul — they're the foundation of a long-lasting partnership. Our team is committed to providing the support you need to keep your equipment in operation, maximize your up time, and protect the value of your investment. When you choose MTM, you become part of our family, and we'll stand behind every body we build to help you succeed.

MAKE THE MOST OF EVERY MILE

Our team of experts is here to help you spec a dump body that's optimized for your operation. We understand the demands of uptime and profitability, and we're redefining the standards of performance with smarter engineering — from cross memberless designs and rolled floors to safer body locks and bolt-on cab shields. Every detail is built to make installation easier, improve durability, and maximize productivity with every load. You work hard for every job; we help you get more out of it.

THE MTM PROMISE

- Advanced engineering to maximize your payload
- Industry-leading warranty
- Easy factory financing
- Dedicated service team

MTM DUMP BODIES

The MTM Advantage

MTM Body Lock

Our unique rear hinge lock delivers a safer, more reliable hold while providing easier access to the service truck chassis. This feature comes standard on every MTM Dump Body.

Cab Shield

Our bolt-on cab shield is standard on every MTM Dump Body, making installation and adjustments simple with 8" of height flexibility across all variants. A uniform bolt pattern and fully painted finish (no exposed raw metal) ensure durability, consistency, and easier service.

Cross Memberless Design

Our cross memberless design reduces weight, eliminates washboarding, and makes dumping easier and cleaner. Available with custom options like heated floors, it's engineered for efficiency and durability.

Internal Hi-Lift Cylinders

By positioning the hi-lift cylinders inside the corners, MTM reduces moving parts and protects components from exposure — delivering longer life and less maintenance.

Rolled Floors

Like our end dump trailers, MTM dump bodies feature rolled (not pressed) floors for smoother material release and better clean out. All sheets are rolled in-house, ensuring precision, consistency, and quality you can count on.

Integrated Tarp System

The tarp system is built directly into the cab shield pillars, keeping all components below the shield line for a cleaner look and better protection than traditional add-on systems.

Tailgate Latch

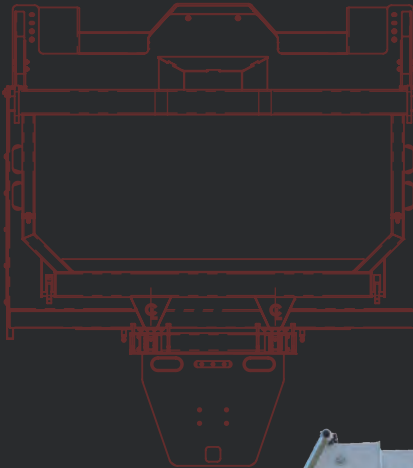

Placed inside the corner, our tailgate latch is easier to access, more serviceable, and simple to adjust — saving time on the job.

Standard Specs

ENGINEERED TO PERFORM

Standard Specs

- 16' Tub Length
- 48" Side Heights
- 18" Cab Shield Depth
- 4500 lbs Standard Tub Weight*
- 25 Ton Capacity
- 3/16" Sidewalls
- 1/4" Floor Thickness
- MTM Rear Hinge Lock

Custom Options

TAILORED TO YOUR WORK

Additional Options & Ranges

- 15' - 21.5' Tub Length
- 48" - 60" Side Heights
- 18", 24", 30", & 36" Variable Cab Shield Depths
- 3/16" - 1/4" Sidewalls
- 1/4" - 5/16" Floor Thickness
- Heated Floors
- Body Vibrator
